

Sprint 1 Plan - UCSC Tutor

Goals: For Sprint 1, we want to have a functioning, independent app that reflects ability for students and tutors to sign up for our app,

User story: As a tutor, I would like to be able to edit a user profile, so that students can see my credentials, availability, and location. (21 story points)

- Task - Implement availability/schedule
- Task - Location/GPS tracker
- Task - Upload picture functionality
- Task - Ability to have description/bio
- Task - Upload/verify credentials/classes taken
- Task - Ratings for tutors

User story: As a user, I would like to be able to sign up for the service, so that I can have access to other students/tutors. (3 story points)

- Task - Signup/login pages for tutors and students that creates/stores info in parse
- Task - Mandatory field requirements upon tutor sign-ups(bio/credentials/picture/location)

User story: As a user, I would like to be able to message my students/tutors, so that I can schedule appointments. (8 story points)

- Task - Set up Sinch library
- Task - Store and exchange Sinch info using Parse.

Team Roles:

Steven Rodriguez (Product Owner, Team Member)
